Company 21 - Simcere Pharmaceutical Group

Address No.699-18 Xuan Wu Avenue Nanjing, P.R.China www.simcere.com

Employees 3000

Brief Introduction Founded on March 28, we have rapidly evolved from a distributor of pharmaceutical products into a

leading manufacturer and supplier of drugs in the rapidly growing China pharmaceutical market. We currently have five Good Manufacturing Practices("GMP")-certified modernized manufacturing bases, two nationwide sales and marketing subsidiaries, one research and development center and total of more than 2,000 employees.

Main products We currently manufacture and sell more than 50 pharmaceutical products and are the exclusive distributor of three additional pharmaceutical products marketed under our brand name, covering a wide range of diseases such as cancer, cerebrovascular and cardiovascular diseases, infections, arthritis, diarrhea, allergies, respiratory conditions and urinary conditions. Our market leading pharmaceutical products include a stroke management medication, Bicun, the first synthetic free radical scavenger (edaravone injection) sold in China; Zailin, a generic amoxicillin granule antibiotic; an innovative anti-cancer medication, Endu (also known as "Endostar"), the first recombinant human endostatin injection approved for sale in China; Yingtaiqing, a generic diclofenac sodium sustained-release capsule for inflammation and pain relief; Anqi, a generic amoxicillin with clavulanate potassium antibiotic; and Biqi, an OTC generic smectite powder for diarrhea. These products contributed annual revenue of more than RMB 800 million in 2006. In addition to these core products, Simcere Kechuanning, Zaike, and Faneng each contributed annual revenue of RMB 30 - 40 million in 2006. In addition, China's State Food and Drug Administration ("SFDA") has also granted us approval for the manufacture and sale of 100 other products.

Cooperation plan Our strategic focus is to introduce first-to-market generic and innovative pharmaceuticals for the treatment of diseases with high incidence and/or mortality rates and for which there is a clear demand for more effective pharmacotherapy, such as our first-to-market generic stroke management medication Bicun and our anti-cancer medication Endu (also known as "Endostar").
