Company: **NARZAN OJSC**

The industrial bottling of Narzan mineral water was launched in 1894. Narzan mineral water is considered the top standard when comparative analysis of other waters is performed. The chemical composition of this mineral water has not changed since the time it underwent first chemical tests. The water contains 20 minerals and microelements, which – considering its relatively low level of total mineralization – is a very rare phenomenon. The water gets into bottles directly from the well, thanks to the unique technology of direct filling.

NARZAN OJSC is the only company entitled to use the name of the mineral water source. The company pays great attention to the product quality and the anti-counterfeiting measures. For example, a 0.5-liter glass bottle of Narzan«Elite» has several levels of protection – such measures help preserve the trademark uniqueness.

The enterprise is equipped with the most modern equipment and uses energy saving technologies. NARZAN aims to organize its production with minimal – or even no – damage to the environment.

Company: CLEAR WATER COMPANY NORINGA LLC

The company was founded in 1998. It owns four modern water production complexes and produces drinking and mineral water under the Noringa trademark.

The unique Health & Balance LIFE production technology brings together many modern processes that serve to ensure proper quality control. Drinking water is bottled into 19-liter polycarbonate bottles made of high-quality non-porous and environmentally friendly plastic that does not react with water at the molecular level and does not affect the water taste, color, smell or composition.

Noringa water is supplied to a hundred cities in Russia. The turnover for the year 2015 amounted to 1.3 billion rubles. Clear Water Company is a member of the Union of Russian Bottled Water Producers and seeks to comply with international quality standards. The guarantee of this conformity is the Certificate issued to the company by NSF-International – the sole partner of the World Health Organization in the field of water safety and quality control.

Company: BAIKALSEA CO.

BAIKALSEA Company was founded in 2006 and based its business on the mineral water deposits and water brands known since 1968. BAIKALSEA Co. is Russia's only producer of premium-segment Baikal water, and the leading producer of bottled water from artesian springs.

BAIKAL PEARL natural water is extracted from the 100-meter deep artesian spring. The water from the spring flows into the lake and its composition is almost identical to the one of the deep water. The water source is completely protected from any external influences, which guarantees the highest quality of the products. The age of this water is about 20 million years.

BAIKAL WATER is extracted from Lake Baikal – and the water source is located on the depth of 430 meters. This is the only Russian brand of mid-priced segment that surpasses other kinds of water in terms of purity and quality – thanks to the unique origin of the water and high-quality bottling.

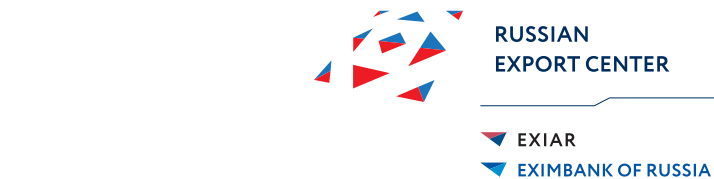

BAIKALSEA Co. adheres to the policy of keeping the production processes open for the consumer, conforming to international quality and security standards, controlling all processes and materials used (including delivery to the retail points). The consumer-oriented program «Journey to Lake Baikal» is on. BAIKALSEA products are sold in major cities of Russia in leading retail and hotel networks. The company is increasing its exports to CIS countries, China and the EU.

Company: AGROSOYUZ LLC

AgroSoyuz LLC was founded in 2003. One of the main spheres of its activity is the production and sale of packaged sunflower and pumpkin seeds under the brand names «Stanichnye», «Tambovsky volk» and «Golden Gift». In 2016, AgroSoyuz ranked among the top five producers of roasted seeds in Russia. The distinctive features of this brand is the use of environmentally friendly raw materials, only natural ingredients without any chemical or flavor additives, and its bright packaging design. The company introduces various marketing programs to promote its products that are sold in over 50 regions of Russia and get exported to the US, Canada, Australia, New Zealand, Israel, the EU and CIS countries. The company's strategic goal is to get access to the Chinese market. Since 2014, AgroSoyuz has been participating in many international exhibitions in China. According to the conducted market research the company's products will be in demand in the PRC.

Company: BIOFOODLAB LLC

BioFoodLab has been engaged in development and sales of organic food since 2011. The company uses its own technological innovations to preserve useful substances during the products' processing.

Bite bars produced by the company contain no more than 7 natural ingredients that are rich in healthy elements – protein, fiber and vegetable oils containing Omega-3 and Omega-6 fatty acids. Bite bars are sweet because of glucose and fructose contained in dried fruits and berries. Bite bars contain no preservatives, dyes, stabilizers or emulsifiers. They are absolutely natural.

The company's products are widely sold in Russian retail stores, cafes and sports clubs. The company is a partner of Nike and Disney, it actively supports sports and charity events. BioFoodLab exports its products to Hong Kong, China, Kuwait, Estonia, England and Canada.

Company: RIZZILE TRADE LLC

The company began functioning in 2014. Currently, RIZZILE TRADE LLC implements the BFH (Best for Health) project – the idea is to find most nourishing, interesting and original healthy products – something that isn't in the market or hasn't received wide popularity yet – and sell this food under the BFN brand.

The BFN product range includes «Longavita» bioenergy water enriched with magnesium and potassium salts. Among other popular products are linseed oil enriched with a mixture of cold-pressed edible oils, and berry nectars – functional inulin-enriched drinks based on palatinose (the so-called «slow carbohydrate») and directly-pressed juices. HoneyBerry is natural honey whipped with berries or nuts. It combines the tenderness of whipped cream honey with unique taste of berries.

Montea tea compositions are blends of high-quality tea leaves and herbs from ecologically clean areas of the Altai Mountains, the Urals and Siberia. They are known for their balanced content of vitamins, minerals and other biologically active substances. Montea teas are not medicinal beverages; they are suitable for daily consumption.

Company: VOLOGODSKAYA YAGODA LLC

Vologodskaya yagoda LLC is at the market since 1991. It is engaged in picking, IQF freezing and processing of berries, fruit, mushrooms and vegetables as well as production of concentrated juices, semi-finished purees and directly squeezed juices. It has a full-cycle production – from collection of raw materials and up to finished products. The company's global mission is to help people to keep a healthy lifestyle. The company processes berries and mushrooms; it has its own procurement network that supplies raw materials for the production lines and helps to ensure the quality of the final product from the first stages of the manufacturing process.

The major share of the output accounts for quick-frozen berries and mushrooms that are processed with the use of «shock freezing» technology. The available equipment makes it possible to freeze up to 250 tons of foodstuff per day and store up to 180 000 tons of frozen products at the company's storage facilities.

Among the company's clients are the leading Russian and international manufacturers from various spheres: juice production, HoReCa sector, confectionaries and dairy production, pharmaceutical industry, food-canning industry etc.

Company: **HEALTH FROM NATURE LLC**

Health from Nature LLC is the creator of a new category of functional beverages brand produced under the FITOGURU brand. It was founded in 2008.

The FITOGURU bio-drink is a unique mix with the ingredients being extracts of wild herbs, roots, flowers, berries, fruit, vegetables, and honeycraft products.

FITOGURU makes up for the poor food ration by providing a measured dosage of biologically active substances that are missing in the diet.

FITOGURU repletes (not drains, like energy drinks do) the human body – a bottle of this drink contains 50% of the dosage of all biologically active substances needed daily.

The bio-drink was developed jointly with the Russian Institute of Nutrition of the Academy of Medical Sciences and the Institute of Phytotherapy.

Company: **BIOLOGIC LTD**

The company was established in the year of 2003 and is one of the leaders on the Russian market of honey.

Honey is collected in ecologically clean areas of Russia: foothills of the Altai Mountains, northern regions of Bashkortostan and Krasnodar Kray. Every year the company harvests linden honey in the four Northern areas of Bashkortostan, and in respect to other types of honey (mountain, May honey) it manages to obtain a special taste due to the blending of honey collected at a distance of 12 thousand km between each other. The company can boast of having a unique formulation of honey-cocktails.

The company auditors check all the aspects affecting the product quality: composition of honey plants, location and equipment of the apiary, professional skills of beekeepers. Each batch is tested in a certified laboratory. Unlike most competitors, the company was granted a right to indicate «Shelf life is 2 years» on their products (according to GOST — 1 year) following three years of laboratory testing. The products are represented in the biggest Russian trade networks.

Company: **CHALYKH O.D.
SOLE PROPRIETOR**

The Donaterram company specializes in growing vegetables, fruits and berries, as well as in their processing. One of the main spheres of its business is the production of sun-dried tomatoes and tomato sauces (Italian sauce, sauces for meat and fish, and classic tomato sauce). Fruit marshmallow paste («pastila») and its varieties are produced from fruits and berries: thin pastila, soft pastila cubes, pastila candy, fluffy pastila cake made with egg whites. The company also produces watermelons chips and several kinds of flavored salt with spices and herbs: for meat, fish and vegetables. The company also makes herbal teas of popular compositions: black tea with leaves of black currant and raspberry bushes and giant hyssop; black tea with baked apples and cinnamon; green tea with lemon peel and sage. The output of production is as follows: sun-dried tomatoes – 400 cans (350 g each) per month; pastila - 300 large sheets of thin pastila per month, 10 kg of soft pastila cubes per month.

Donaterram actively uses social networks to promote its products in the market and enhance their sales; the company owns an online-store, too.

Company: WATER OF LIFE LLC

The WATER OF LIFE company was established in 2013. Its main aim is to create and implement the project of production and bottling of unique Salair natural drinking water extracted from the artesian wells in Siberia, at the foothills of Salair Ridge. «Salair» is the code name of this project.

Salair water is the most expensive and high-quality water of Russian origin – it belongs to the super-premium segment. The composition and quality of this water place it in the line with other elite waters of internationally-known brands (in some aspects Salair even surpasses them).

Up to 90% of water sales are expected to be taken up by exports, i.e. the plan is to promote this high-quality product of Russian origin in the world markets and enhance the prestige of Russia and Siberia as manufacturers of world-class product.

The WATER OF LIFE company is in the process of entering the overseas markets with its own unique product; the certification is on the stage of development.

Company: AQUALIFE COMPANY

The AQUALIFE company has been producing soft drinks and drinking water since 1997. Its main production facility is located in a unique natural area (45 kilometers to the North-East from Moscow). Mineral water of highest purity is extracted from a unique underground water basin. Four artesian wells are located in a specially protected zone on the territory of the enterprise: two of them are each 105 meters deep and belong to Gzhelian-Asselianaquifer, the other two are 170 meters deep and belong to Kasimov aquifer. The water passes five stages of special treatment; every 8 hours its quality is checked according to over 20 indicators.

In order to improve the effectiveness of federal distribution, AQUALIFE purchased a similar production facility in the city of Novosibirsk in 2015. BAIKAL water is true relic water from Lake Baikal. Its oxygen content is 10.12 mg/l three times higher than in regular drinking water. Product market share in Russia - 6%. Distribution in Russia 70 thousand retail points; gets exported to 18 countries, is sold in the Mix Markt transnational network. The sales in China start in August, 2016.

Company: CONFECTIONERY ALKION LLC

Alkion confectionery was founded in the year of 2015. It produces premium class products from 100% natural chocolate. Cacao beans that are used in production, grow in Ecuador where soil and climate combination gives the chocolate a unique flavor and unsurpassed taste. The Alkion products represent combination of chocolate with unusual additions — chili, sea salt and other natural ingredients. The products are hand-made. Staff have graduated from chocolate craftsmanship schools. The company has a considerable experience as for cooperation with retailer networks. The company can produce products by special orders: from your idea to finish product.

Company: ALEYSKZERNOPRODUCT NAMED AFTER STAROVOITOV S.N. CJSC

Aleyskzernoproduct was founded in 1932. It is one of the leading grain processing companies in Russia. This company is a modern and dynamic agro-industrial complex of full technological cycle – from the cultivation of grain and its processing and up to the production and sales of finished products.

The company is located in the Altai region – the environmentally clean part of Siberia with unique natural conditions. This area has long been famous for the cultivation of high-class wheat and other grain varieties.

CJSC Aleyskzernoproduct named after S.N. Starovoitov» uses only the best Altai grain to produce over 100 kinds of high-quality products under the «Aleyka» trademark.

The company has 12 sales offices in Russia. In 2007, Aleyskzernoproduct registered its own company in Beijing in order to be closer to customers from China and Southeast Asia, and to ensure reasonable prices for its top-quality products.

Company: **AGROKOMBINAT
TAMBOVKRAKHMAL LTD**

The company has been operating on the Russian market within three years. It manufactures whole wheat flour. The market share is 7%, the sales volume is 230 tonnes per month.

The Danish ENGSKO flour mill with natural millstones is used in the production process. It allows grinding of grain as a whole, while maintaining the beneficial properties of the grain in the flour, since grain is involved in the grinding process as a whole without separating the bran and germ. Millstone mill features a large number of changeable parameters: the grinding size, quantity of bran and large particles etc.

Only high-quality grain is selected for processing, a rapid quality analysis of grain and flour is conducted in our own laboratory on a regular basis. Flour fully meets the European quality standard.

The products are represented in the regional chains.

Company: GARNEC LLC

The company is one of the leaders in Russia and the countries of Eurasian Customs Union in the production and sale of «other flour» and flour mixtures without gluten. The company was founded in 2008.

The company shows its commitment to simple, healthy foodstuff. Raw materials are coming from environmentally clean areas of Russia. The company aims to spread the idea of about the benefits of consumption of natural unrefined flour.

Wholemeal flour or wholegrain flour contains all the nutritional components of the grain, including the shell and germ. During the processing, grain, cereals and flour are in contact only with stainless steel at a temperature not exceeding 40 °C, which allows to preserve vitamins. Structure of the flour Garneс is similar to the structure of flour ground by the mill stones, and contains in equal proportions particles - from the smallest to quite large ones. The products are available in the largest trade chains in Russia and EU countries. Garneс was the first company on the Russian market which started to pack flour in 0.5 kg paper bags.

Company: PARITET CO. LTD

Paritet Co Ltd is a Russian manufacturer of ready-to-cook fruit muesli and cereal. Our team of technologists and nutritionists is going through constant search and development of new sorts of products via learning taste preferences of our customers mostly presented by young parents, children, sportsmen and those, who have reviewed their nutrition habits. The main difference between our products and those developed by the rival companies is that our products' content enables them to be recognized as healthy nutrition. Our heading line of products containing FIBREGUM PREBIOTIC is a proof to this claim as it also contains WHEAT GERM flakes sprouted of elite sorts of wheat to the state of embryonic germ. We use genuine olive oil and fructose instead of sugar to produce crunchy flakes. High quality natural ingredients make our products reach high taste characteristics. We are just about to launch a brand new line of production – BRAN.

1. Prebiotic (FIBREGUM) is organic nutritive dissoluble fiber of vegetable origin possessing strongly marked prebiotic qualities.
2. Wheat germ can restore and regulate vital processes of an organism, normalize and stabilize its metabolism, strengthen its immune system, and remove toxins.
3. Bran consists of a rich and replete complex of elements such as vitamins D₃, A₁, A₂, A₆, A, provitamin, magnesium, potassium, chromium, copper, zinc, and other mineral elements. It can lower level of blood cholesterol due to the dissoluble fiber it contains.

Company: **SHISHKOV ANDREY
VLADIMIROVICH SOLE
PROPRIETOR**

The individual entrepreneur has been operating in the market for over three years and has a network of distributors in the Volga region, the Moscow region and in the north-west of Russia. It produces and sells flour, cereals and pasta made of spelt under the «DedSengiley» brand.

Spelt is a special variety of wheat, characterized by a one-of-a-kind morphological structure of grains and wheat ears. It is rich in crude fibers and low in calories content; besides, it contains essential amino acids (and much less gluten than regular wheat does). Spelt is recommended for dietary and diabetic food production: it contains essential nutrients – not only in the shell, but in the entire grain – this is why even finely ground spelt retains its nutritional value.

A large, clear glass bottle of Tsarskaya vodka is the central focus, positioned in the foreground. The bottle has a white label with a portrait of a woman and the text 'ВОДКА ЦАРСКАЯ'. The bottle is set against a background of a grand, multi-story building with many windows and a red roof, possibly a palace or government building. The scene is set in a snowy, winter environment with trees and a path visible. The overall image has a dark, moody atmosphere with a blue and purple color palette.

Company: SPIRITI GLOBAL GROUP LTD

The Spiriti company was founded in St. Petersburg in 2010. Its main activity is the creation of high-quality alcoholic beverages of international class. There are several brands in the company portfolio, including the RUSSIAN SPEECH premium-class vodka, the KEN-TO liqueur line and the KEN-TO Acai vodka. All products are made at the «Fortuna» distillery – one of the largest producers of vodka in the Krasnodar Territory, also recognized as the best vodka producer in the region. Traditional and modern recipes, as well as best natural ingredients are used for the beverages production. «Fortuna» distillery is accredited as an excise warehouse in compliance with all the requirements for accounting and products' safety. The local system of requirements for the vodka production is more rigid than the one required by the state norms.

Spiriti is an active participant of the Russian Spirits Alliance (RSA). The Spiriti brands are supplied to the Russian retail network, HoReCa channel, as well as get exported to China, Brazil, Argentina, Congo, Nigeria and other countries.

Company: BALTIKA BREWERIES JSC

The Baltika Company is the largest brewing company in Russia. It was founded in St. Petersburg in 1990. The company is comprised of breweries with the aggregate capacity of about 40 million hectoliters per year. The breweries are located in 8 Russian cities: St. Petersburg, Yaroslavl, Tula, Voronezh, Rostov-on-Don, Samara, Khabarovsk and Novosibirsk. The Company also owns two malt houses and an agricultural project. The Company produces a wide range of beer: light and dark beer, lager and ale, alcohol-free and strong beer of locally- and internationally-sold brands. Modern equipment and advanced technologies made it possible to produce highest-quality alcohol; as a result, Baltika has held the title of the No. 1 Company in the Russian beer market since the year 1996. Baltika is the largest exporter of Russian beer, and its products are sold in more than 75 countries around the world, including Western Europe, North America and the Asia-Pacific region. Baltika's products received awards at over 650 Russian and foreign competitions.

Company: MOSCOW CHAMPAGNE WINERY JSC

Moscow Champagne Winery was founded on the 29th of December 1980. The plant is located on 8 acres in the south-west of Moscow and is one of the largest plants in Russia that produces about 50 mln. bottles per year. JSC «MKSHV» produces champagne and wine by all known methods: reservoir periodic/non-periodic and classic champagne bottle method. Regardless of the method of production is the result of bubbly carbonation during secondary yeast fermentation — a natural carbon dioxide is formed. All the raw materials meet high production requirements. Despite all the achievements, the company is not standing still and is constantly developing, modernizing production, expanding technological and managerial capabilities to maintain consumer confidence.

Brand: Moscow champagne, Moscow Elite champagne, Moscow Collection champagne, Russian champagne

Company: CHERKIZOVO GROUP OJSC

CHERKIZOVO GROUP is Russia's largest producer of meat products. The Group is among the three leaders in the national markets of poultry, pork and processed meat products, and is the country's largest producer of fodder. Cherkizovsky Meat Processing Plant was opened in Moscow in 1974. CHERKIZOVO GROUP was founded in 2005. The enterprise structure includes 8 full-cycle poultry farms with the total capacity of about 550 thousand tons of live weight poultry per year; 15 modern pig farms with the total capacity of 200 thousand tons of live weight pigs per year; 6 meat-processing plants with the total capacity of 190 thousand tons per year; 9 fodder plants with the total capacity of about 2.5 million tons per year; grain elevators with the storage capacity of 850 thousand tons; and over 140 thousand hectares of agricultural land. In 2015, CHERKIZOVO GROUP produced over 825 thousand tons of meat products. CHERKIZOVO GROUP demonstrates the long-term sustainable growth in sales and profits thanks to its vertically integrated structure of production that includes the cultivation of grain, elevator storage, own fodder production, breeding, rearing and slaughter of animals, as well as meat processing and own distribution network.

Company: MIKOYAN MEAT PROCESSING PLANT CJSC

MIKOYAN MEAT PROCESSING PLANT is the oldest meat processing enterprise in the country: it was founded in 1933 and now is a part of EXIMA – a largest agricultural holding.

According to the survey of consumers, MIKOYAN MEAT PROCESSING PLANT holds the first place in the ranking of sausage products in Russia with the score of 82.5%, and the first place in the ranking of brands for Russian consumers with the score of 28.1%.

The secret of its products' popularity lies in the original brand recipes that the enterprise has kept for many decades. Another secret of success is the fact that the products are made only from fresh and chilled raw products, natural milk and spices. MIKOYAN MEAT PROCESSING PLANT makes extensive investments (with the support of the EXIMA corporation) in domestic agriculture and uses the products grown and cultivated at the farms it owns. The advanced technologies and powerful production lines make it possible to produce over 400 tons of products per day. The range of the goods brought to the market currently includes 250 kinds of sausages and delicacies, as well as nearly 40 kinds of meat and meat-and-cereal canned food.

The plant takes a special pride in its chemical and bacteriological laboratory that has no analogues in Russia in terms of technical equipment and the level of its employees' training.

Company: RESOURCE GROUP OF COMPANIES

Four agricultural enterprises united to form the «Resource» Group of Companies in 2003 with the aim to create a unified technological process and build an effective vertical business management. Over the years many large enterprises of agricultural and industrial complex of the South and North Caucasus joined the «Resource» Group of Companies.

Modern poultry breeding technologies and equipment, as well as compliance with quality standards and high requirements for the products ensured the company's rapid growth and development.

In 2015, the share of «Resource» in the overall Russian production of live weight broiler meat constituted 5.5% (331 thousand tons), with the production in the entire Russia being 6009.7 thousand tons. In 2015, «Resource» ranked first (45.7%) in total exports of poultry meat from Russia with its 26.8 thousand tons of exported meat. It also ranks first (62.4%) in exports to Kazakhstan. The company permanently ships its products to the CIS countries, as well as makes one-time deliveries to foreign countries. The plans for 2016 are to increase the volume of exports up to 100 thousand tons, and to enter new markets in such countries as China, Saudi Arabia, Afghanistan, Iraq, Jordan, the UAE, Egypt, Kuwait, Omar, Qatar and others.

Company: ZNAMENSKY SELEKSIONNO-GIBRIDNY CENTER LLC

ZnamenskySelekcionno-Gibridny Center LLC was established by the EXIMA Agricultural Holding in 2006. Today it is one of the largest Russian manufacturers and suppliers of genetic material for pig farming. The company operates according to the «from field to counter» principle. The company's work is aimed at improving the productive characteristics of both pedigree pigs and pigs bred for commercial purposes. The resulting genetic progress (aimed at improving the production and the final product of pig breeding) is transferred to the breeding stock of pigs kept at the industrial complexes that belong to the partners. This helps the pig-breeding companies stay competitive in the market of industrial pork production. Znamensky SGC is engaged in pig breeding technologies in partnership with the world's leading genetic companies. The industrial structure of Znamensky SGC includes breeding plants with the capacity of 4000 breeding pigs used for the maternal lines of Large White and Landrace breeds; a breeding plant with the capacity of 600 breeding pigs used for the paternal lines of Magnus (Duroc) and Maxter (Pietrain) breeds; breeding and commercial reproducers; a fodder plant with the capacity of 30 tons of fodder and 10 tons of AVMA per hour. The enterprise produces 40 tons of finished and semi-finished meat products per day.
